## Achieving Manufacturing ROI...

*Now more than ever, it is critical for companies to fully enable their teams and to further leverage their new and existing assets to increase both their production and organizational productivity. We can help!*

### Manufacturing Process Assessment

- 2 to 5 day manufacturing programming process review.
- Summary report provided with specific process and productivity improvement recommendations.
- **Cost of assessment services can be applied toward Adaptive mfg. programming, training, or mentoring services.**

### Manufacturing Mentoring & Skills-Transfer

- Services to enable teams to improve inefficient legacy processes and to utilize best practices moving forward.
- Potential productivity improvements of up to 25% or more.

### Manufacturing Process Standardization

- Services include both skills-transfer and specific process catalogue programming.
- CATIA Manufacturing Process Catalogues have the potential to reduce programming by as much as 50% or more.
- Process standardization allows lessons-learned and best-practices to be used by the full team; providing programming consistency and reducing errors moving forward.

### Expert CATIA Mfg. Programming Services

- Programming services available either on-site or off-site.
- On-demand expert U.S.-Based CATIA Mfg. programming services available to operate as an extension of your team.
- On-demand expert programming services available for critical part programming and to help meet peak work load requirements.

### Optimizing Machine Tools and Toolpaths

- Services to help ensure complex multi-axis machine tools are up and running ASAP to meet critical expectations.
- Analysis to help optimize toolpaths up to 10% or more.
